

West Texas Interagency Wildfire Academy
Dumas, Texas
January 23 - 27, 2002

Class Descriptions

I-100 ICS Orientation
S-130 Basic Firefighter Training
S-190 Introduction to Fire Behavior

***PPE Required**

January 24 - 27 (4 days)

\$160.00

Entry-level courses that offer firefighting skills. You will gain an understanding of fire behavior factors to aid in the safe and effective control of wildland fires, gain valuable field experience and a basic knowledge of the structure and concept of the ICS system. *Pre-study is required.*

S-211 Portable Pumps and Water Use

***PPE Required**

January 23 - 24 (2 days)

\$80.00

This is a combined self-paced field exercise course providing training for a portable water pump operator, and consists of three instructional units: supply of water, delivery of water, and application of water. A field exercise requires the students to set up and operate portable pumps typically used in the area.

S-205/215 Fire Operations in the Urban Interface

January 23 - 27 (5 days)

\$200.00

This course provides training for initial attack incident commanders and company officers confronting wildland fires that threaten life, property, and improvements. This course is for experienced firefighters.

S-214 Basic Engine Academy

***PPE Required**

January 23 - 27 (5 days)

\$200.00

This session will cover foreman duties, engine maintenance, hazardous materials and the use of foam. Students are encouraged to bring their own engines.

S-260 Incident Business Management

January 23 - 24 (2 days)

\$80.00

This course meets the general training needs of all positions for which an understanding of interagency incident business management is required. *Pre-study is required.*

S-261 Applied Interagency Business Management

January 25 - 26 (2 days)

\$80.00

This course is designed for entry-level finance positions, to be taken after completion of Interagency Incident Business Management, S-260.

S-290 Intermediate Wildland Fire Behavior

January 24 - 27 (4 days)

\$160.00

The 12 units of this course go beyond S-190 in providing more detailed treatment of fuels, weather and topography, and a stronger basis for analyzing variables and their interactive effects on fire behavior. This is a "skill" course that is designed to instruct prospective fireline supervisors in wildland fire behavior for effective and safe fire management operations. *Pre-study is required.*
